

## Active hearing protection.

Kaf™ i16, a groundbreaking innovation in hearing protection and communication from ParsTek. Designed to safeguard your hearing against sudden loud noises while enhancing speech clarity in challenging environments, the Kaf™ i16 is the perfect companion for high-noise settings like shooting ranges or industrial workplaces. Whether protecting your ears from the sharp sound of gunshots or the roar of heavy machinery, the Kaf™ i16 ensures that you stay safe without sacrificing the ability to hear conversations and environmental sounds with precision.

With advanced noise reduction technology, the Kaf™ i16 actively minimizes harmful noise levels, protecting your auditory nerves and preserving your hearing system. Experience unmatched safety, comfort, and clarity with the Kaf™ i16.

Kaf™ i16

## Key features at a glance

- Rapid detection and suppression of loud sounds in just 4ms.
- 16 independent frequency channels for precise sound processing.
- User-adjustable amplifier for personalized sound control.
- Custom-fit design for maximum comfort.
- Advanced digital noise reduction for a clearer listening experience.
- High-resolution speech detection for improved communication.
- Fully customizable to suit individual needs.

## Smart Protection: Identify and Block Impact Sounds.

The Kaf™ i16 hearing protector fits comfortably inside the ear canal and features a rotary volume control, allowing users to adjust sound levels from 0 to 30 decibels. This ensures enhanced hearing when needed, without risking damage, even in noisy environments.

With 16-channel frequency separation and an advanced noise cancellation system tailored to your surroundings, the Kaf™ i16 delivers crystal-clear sound quality.

Additionally, its customizable design ensures a perfect fit for your unique ear canal shape and adapts to the specific environments where you live or work, maximizing the efficiency of the Kaf™ i16.
